

**Spectrum  
Glass**

**Pattern of the  
Month**

### **Road-Runner** by Bud Myers

This Sprinting desert bird looks great hanging on a wall, in a window, or mounted in a wooden base (try driftwood). The eye-piece is an overlay on the head, soldered at one point. The eyeball is a solder blob. Use heavy, tinned copper wire for the legs (14 gauge will do). Designed by Bud Meyers at Bud's Glass N' Craft, Burbank, CA.

### **Spectrum Glass Color Suggestions**

- |            |                  |
